MICROSOFT INTUNE

BEGINNER TO ARCHITECT LEVEL

ANNECTENS.ODOO.COM

Academy Trainer

Hello everyone, I'm Vaibhav - and I'm thrilled to be your Mentor on this transformative journey into the world of IT Systems, Device Management, Cloud Technologies, and Cybersecurity. With years of hands-on experience in enterprise environments, I am EUC Architect and specialize in tools like Microsoft Intune, SCCM, MS Defender and PowerShell Scripting. I'm passionate about turning complex concepts into clear, actionable knowledge that empowers professionals like you to thrive in real-world scenarios. At Annectens, we don't just teach - we MENTOR, we CHALLENGE, and we celebrate growth. I'm here to support you with Practical insights, engaging sessions, and a learning experience tailored to your goals.

Microsoft Intune FAQ

Microsoft Intune is a cloud-based service that helps organizations manage devices (like laptops, phones, tablets) and apps securely. It's part of Microsoft's Endpoint Manager suite and is widely used for Mobile Device Management (MDM) and Mobile Application Management (MAM).

Can I learn Intune as a fresher?

Yes, absolutely! Intune is beginner-friendly and many professionals start learning it without prior experience. You don't need to be an expert in IT to begin—just a willingness to learn and explore.

Do I need to know servers or networking?

Not necessarily. While basic understanding of IT concepts like Active Directory, networking, and cloud services can help, you don't need deep server knowledge to start. Intune is cloud-based, so most of the work is done through a web portal.

Do I need to know programming or scripting?

No programming is required to get started. However, learning PowerShell later can help automate tasks and make you more efficient. But it's not mandatory for beginners.

What are common fears beginners have?

- **"It looks too technical."** → Intune has a clean interface and lots of documentation.
- **"I don't have IT experience."** → Many start fresh and grow into the role.
- **"I'll break something."** → You can practice safely in test environments or trial tenants.

Is Intune a good career move?

Yes! Intune is in high demand as companies move to cloud-based device management. Learning Intune opens doors to roles like:

- Endpoint Administrator
- IT Support Specialist
- Security Analyst
- Cloud Administrator

Microsoft Intune Salary!

Here's a detailed breakdown of the salary package for an Intune Architect in India, especially in Bengaluru, as of 2025:

General Microsoft Intune Salary Insights (India, 2025)

- Average Salary: ₹17.3 LPA
- Range: ₹13.7 LPA to ₹29.6 LPA
- These figures are based on professionals with Microsoft Intune skills across various roles, not just architects.

Intune Architect Salary in Bengaluru (2025)

- Microsoft Architect Roles in Bengaluru:
 - Range: ₹30 LPA to ₹87 LPA
 - Experience: 10–19 years
 - This includes senior-level architects, likely encompassing Intune-focused roles.

SCCM / Intune Infrastructure Architect:

- Experience: 6–11 years
- Salary Range: ₹14 LPA to ₹18 LPA
- These roles are more hands-on and infrastructure-focused

Interview Preparation

Exam mode ⓘ

6/25  ⌚ 56:33 || [Finish test](#)

📄 Question 6:

An organization currently deploys Enterprise or Education edition images for thousands of machines. This process involves entering the Key Management services or Multiple Activation Key and restarting the device. Unfortunately, this manual process is significantly impacting the organization's SLA, as they cannot meet clients' requirements due to the time-consuming and tedious nature of the task.

How can they implement a change to improve this situation?

- Use Inherited Activation
- Use MAK
- Use Subscription Activation
- Use CSP program

WHY CHOOSE US?

Lifetime FREE Benefits!

- UNLIMITED Revision Classes
- Mentorship (On Live Production Issues)
- Access to Professional Network
- Job Updates
- Full Interview Preparation Support
- **All Certification Exam Guidance**
- Resume Proofreading
- Course Completion Certificate
